Articulation Notes
October 31, 2005

UC

UC Davis College of Engineering is in the process of reviewing all existing articulation. You may have noticed that there is no agreement posted on ASSIST for 05-06. We've received notice that they will honor the last published agreement for the purpose of evaluating transfer applications. In our case, the last published agreement is for 03-04.

UCLA has made significant additions and changes in their artic agreements, as follows:

- 1) 71 majors have been added to the existing list of 52 UCLA majors. As of 2005-06, all 123 UCLA undergraduate majors are listed in ASSIST. Each of the 71 is listed with some brief text including web addresses for the major department, the UCLA catalog, and undergraduate admissions; students can view current information regarding course preparation for the major on the departmental web site. In the near future, more specific articulation agreements for these majors will be developed and published in ASSIST.
- 2) They strongly recommend that you pay close attention to introductory text information for majors as well as course information. Web addresses included in the introductory text for several majors have been refined and updated. Also, the following note has been added to the text for each major agreement that contains course-specific information:
PLEASE NOTE: The community college courses listed below have been approved to satisfy the preparation requirements for this major at UCLA, but they may not be exact equivalents of the UCLA courses listed.
This note is meant only as a point of clarification. Community college courses listed in major preparation agreements are not always exactly equivalent to UCLA courses; they are approved to meet major requirements, but they do not represent course-to-course articulation.
- 3) The General Education requirements for UCLA's Henry Samueli School of Engineering and Applied Science (HSSEAS) have changed. For details about the updated requirements, please go to [www.seasoasa.ucla.edu/GE%20requirements/GE%20requirement link.htm](http://www.seasoasa.ucla.edu/GE%20requirements/GE%20requirement%20link.htm). Information about the HSSEAS General Education requirements has been updated in the introductory text found at the beginning of each engineering major agreement.
- 5) The course preparation for the Anthropology/B.S. major has been expanded to include one course in statistics.
- 6) On the Civil Engineering major, under the section listing additional degree requirements, the Circuit Analysis requirement (UCLA EL ENGR 10 or 100) has been deleted.
- 7) On the Computer Science and Engineering major, under the section listing additional degree requirements, a Circuit Measurements Lab course (UCLA EL ENGR 110L) has been added.
- 8) The statistics course requirement for the Business Economics, Economics, and Economics/International Area Studies majors has changed. The UCLA course, Statistics 11: Introduction to Statistical Methods for Business and Economics, has been replaced by Economics 41: Statistics for Economists. Economics 41 must be completed at UCLA after transfer.
- 9) On the Electrical Engineering major, under the section listing additional degree requirements, a computer science course (UCLA COM SCI 31) has been added.
- 10) As noted in the updated introductory text at the beginning of each UCLA Life Sciences major agreement, current applicants are strongly advised to complete one semester of organic chemistry with laboratory in addition to the minimum year of biology with laboratory, year of general chemistry with laboratory, and year of calculus. Students planning to transfer in Fall 2007 and later should definitely complete one semester of organic chemistry with laboratory in addition to the minimum biology, general chemistry, and calculus course pattern. Life Sciences majors include: Biology; Ecology, Behavior, and Evolution; Marine Biology; Microbiology, Immunology, and Molecular Genetics; Molecular, Cell, and Developmental Biology; Neuroscience; Physiological Science; Plant Biology; Plant Biotechnology; and, Psychobiology.
- 11) On the Math/Applied Science major, under the Operations Research Plan and the Management and Accounting Plan, UCLA's Management 100 accounting course has been removed. Management 100 is an upper division course at UCLA and no lower division community college courses will be accepted in its place.

Merritt College

- 05-06 TCA has been approved and posted on ASSIST. New advising sheets are on the rack.
