

Merritt College Counseling Department

Articulation Notes
September 29, 2003

1. **UCSC New Artic** Over the summer, I submitted a number of courses for new artic with UC Santa Cruz. Many of them have been approved and are posted on ASSIST. UCSC will place them in course-to-course articulation and plug them into the major prep patterns on ASSIST.
2. **New Math Major at CSUMB** CSU, Monterey Bay recently added a new math major and are now offering a BS in Mathematics effective Fall 03. You won't see this in their current 03-05 catalog but it will be included in any catalog addendums printed in the future and should appear on their online catalog soon. Existing articulation for Math classes will appear on their core math list and they hope to publish artic info on ASSIST asap. Contact admissions or the math dept. at CSUMB for more information.
3. **UCB New Artic** Merritt's GEOL 1 has been approved for articulation with UC Berkeley's CIV ENG 70 and has been posted on ASSIST.
4. **UCSB Artic Updated** The 03-04 artic agreement with UC Santa Barbara has been updated and published on ASSIST. It includes all course changes and adjustments to major requirements.
