

Merritt College Counseling Department

Articulation Notes
November 25, 2002

1. **SO3 Laney Schedule Correction** The prerequisite for BIOL 48GA, *Fundamentals of Biotechnology* is BIOL 10, not BIOL 11.
2. **UC Application Filing Extension** Because November 30 falls on a Saturday, the application filing period for UC expires at the end of the December 2, 2002 business day (as posted on the Application Center of UC Pathways). A caution, however. Waiting until the last minute (regardless of the deadline date) may cause the computer application system to crash, jeopardizing the timeliness of students' applications.
3. **UCLA Winter Admissions Changes** A recently approved decision at UCLA will close winter transfer admissions to all majors except Engineering, effective winter 2004. Fall transfer admissions will continue to be open to all majors and programs in the College of Letters & Science, School of Arts & Architecture, Theater, Film, & Television, Nursing, and Engineering.
4. **Online Preparation for SAT & ACT** The University of California now sponsors a web site that provides free online preparation for the SAT and ACT tests, plus a vocabulary builder. The website is located at: www.distance-educator.com
