Procedure for finding the course recommendation from the above chart:

Searching DOWN the writing score column. Find the score range that conforms to the student's writing test score.. Move directly across the row to the adjacent cell in the reading score column (do not move up the column). If the reading score is in the range in that cell or higher than that range, read the course recommendation directly to the right. If there is no range match in that cell for the test score, search DOWN that column until a match is found. Read the appropriate course recommendation to the right.
